Technology Conference | Innovation Awards
| Fashion Show | Networking Dinner

About TIM 2023

Global Conference

Technology in Maritime (TIM) is maritime industry's largest global conference on emerging technologies and their relevance to shipping industry. An annual event of The Naval Connection (TNC), TIM has successfully completed two years (2021, 2022) engaging leaders and technocrats from all parts of the world.

The TIM Conference is a beehive where technology exponents, seafarers and maritime leaders amalgamate for palpable discourses on the present and future of maritime. The objective is to start preparing for what's coming; because the **FUTURE is NOW**.

Tim 2023 Conference and Networking meet will happen at Mumbai on Sat 18th Nov 2023. The event will be a physical conference attended by maritime professionals from across India and abroad. It will be streamed LIVE to the global audience. TIM conferences are viewed by delegates from over 40 countries worldwide.

Are your businesses and people ready to cash in?

Hot Ideas and Cool Products define the technology markets of the world. However, not all ideas and innovation are financially viable. Harvard Business School professor Theodore Levitt in his 1963 HBR article wrote “Creativity Is Not Enough.” In fact, there’s an important difference between being innovative and being an innovative enterprise: The former generates lots of ideas; the latter generates lots of cash.

At TIM 2023 you will meet entrepreneurs who have excelled in the use of new technologies. That’s why TIM will add such great value to your business. And to You! You will get to meet and network with transformational leaders who are defining the pathway to the future of shipping. The ‘TIM Global Conference and Networking Meet’ will provide you with an extraordinary platform for exchange of information, advice, and referrals.

Your participation in TIM will help you stay on top of the latest trends in your industry, keep a pulse on the job market, meet prospective mentors, partners, and clients, and gain access to the necessary resources that will foster your personal as well as organizational growth.

Awards

Honouring Extraordinary Students and Seafarers

IIM Awards

A young mind is the sharpest mind. It learns quick and acts quicker.

Young minds are bringing about a revolution in the conventional education system by picking machines over books and ideas over words. Prepare to be amazed!

The following link will reveal 26 Innovative ideas by school students that will blow your mind

<https://www.thebetterindia.com/11596/ignite-innovations/>

One probably does not associate maritime colleges in India as breeding grounds for innovation! The 'Innovation in Maritime' (IIM) awards is one of its kind in the industry. IIM Awards will recognise the immense potential of the students of maritime and provide them a platform to experiment and innovate, and come up with something extra ordinary. Students from maritime institutes will submit Innovative Concepts and Ideas to address prevalent challenges in the maritime industry. Concepts have to be unique and original ideas relevant to the challenges faced in the maritime industry. The entries should be submitted through the student's colleges.

In addition, seafarers and students who have passed out from maritime institutes or sailing can also submit papers on innovation in maritime at their individual level.

A global jury comprising of eminent stalwarts of the maritime industry would review all the entries and the first three winners would be announced and awarded the prestigious **INNOVATION IN MARITIME AWARD** at the **TIM 2023** global conference on Sat 18th Nov in Mumbai

The first three winning papers would be sent to the Ministry of Shipping India, Director general of Shipping India and the IMO Technical committee for their perusal. It will also form part of the TIM Souvenir

Last date for submission of papers: 18th October 2023

Kindly submit your papers on media@thenavalconnection.com

Promoting Merchant Navy as a fashionable career for students

In a country of 1,417,644,495 people as of April 2023, India has only around 2.4 Lakh Seafarers and the numbers are decreasing. Why do students not want to join the merchant navy in spite of the high salaries that the industry offers? One reason is that we have failed to glamourize our industry.

Fashion is about looks and character. We need to make our industry LOOK beautiful and show the strength of its character to the outside world.

For the first time, *leaders of maritime and students will walk the ramp* at a glittering show of character – to inspire the new generation to take up merchant navy as a career of choice.
